

Proof of specific entry requirements

Programme: One Year Master's Programme in Artificial Intelligence 60 ECTS

List the courses that you want to use to meet the specific requirements for this programme. Upload this form along with your supporting documentation at universityadmissions.se

Please note!

- This form is for specific requirements only, to assist the admission board to navigate in your uploaded supporting documents. You need to submit all your supporting documentation, including general entry requirements (Bachelor's degree, English proficiency etc), as instructed, at universityadmissions.se
- The department **is not able to give advance notice regarding requirements**. You must apply at universityadmissions.se and upload documents for the Admission Board to review.
- Note that 15 ECTS equal 10 weeks of full-time studies.

Requirements: 22.5 credits in programming and 7.5 credits in databases

In order to fulfil the specific entry requirement of 22.5 credits/ECTS in programming and 7.5 credits/ECTS in databases, you need to have obtained at least 30 credits (in total) in these subjects, either as part of your previous education or independent courses.

Any programming language course (Python, C, C++, Java, Javascript etc.) is acceptable as long as it includes hands-on programming (writing actual code). Any programming language type is acceptable (object-oriented, procedural, logic-based etc.) provided that the course content includes at least the basic knowledge to understand and use the language in practice.

Please note again that the course needs to involve code implementation so courses which only include mark-up languages (i.e. HTML, XML), style sheet languages (i.e. CSS) are not counted in.

The database-related courses are acceptable as long as they involve implementation and not only using the database (i.e. queries).

Note: If you wish to include independent courses, remember that they need to be offered by an accredited University. Courses offered by online learning platforms (Coursera, Udemy etc.) are not counted in.

Instructions

- Name of the course/courses and number of credits you want to include to fulfil the specific entry requirements.
- **Copy/paste the link to the course description and learning outcomes (and/or objectives)** of each course stated on your University's website. Or link to an official descriptive document of the course (for example a pdf).

Courses:

Kind regards,
The Office of Administration
